Project Information Sheet

Project: 804701 Storm Drain Pipes, Manholes, and Laterals Replacement

Category: Origination Year: Planned Completion Year: Origin:	Infrastructure 1999-00 Ongoing Staff	Type: Phase: % Complete:	Storm Drain Ongoing n/a		Department: Project Manager: Project Coordinator: Interdependencies:	Public Works Hira Raina Jim Craig none
Element: Sub-Element:	3 Environmental Management 3.4 Surface Runoff		Goal: Neighborhood:	3.4A City Wi	de	
Fund:	610 Infrastructure Renov & Repla	ace	Sub-Fund:	200 Se	wer Fund Assets	

Statement of Need

This project is intended to provide funding for miscellaneous small storm drainage projects that may arise unexpectedly.

Service Level

no service level effect

Issues

See project 804700 for expenditure history before FY 1999/2000.

Project Information Sheet

Project: 822750 Storm Pump Station Number 1 Rehabilitation

Category: Origination Year: Planned Completion Year: Origin:	Infrastructure 2001-02 Ongoing Staff	Type: Phase: % Complete:	Storm Drain Planning n/a		Department: Project Manager: Project Coordinator: Interdependencies:	Public Works Hira Raina Jim Craig none
Element: Sub-Element:	3 Environmental Management 3.4 Surface Runoff		Goal: Neighborhood:	3.4A Lakewoo	od	
Fund:	610 Infrastructure Renov & Repla				wer Fund Assets	

Statement of Need

Storm Pump Station Number 1 is in need of repair and upgrade to meet today's increased storm runoff volumes. The project includes two phases: Phase one included the replacement of one existing pump and Phase two includes the addition of two new pumps, electrical system upgrades, building expansion, improvements to the wet well and storage basin, new bar screen, and removal of sediments to restore storage basin capacity. Phase I has been completed. A study is underway to determine the storage basin volume, pumping station capacity, and levee elevation to protect the pump station from the FEMA 100-year flood.

Service Level

no service level effect

Issues

The pump station is within the FEMA 100-year flood zone. The elevation of the levees, pumping capacity, and storage volume are inter-related. Improvements to all three items are required to protect the pump station from the FEMA 100-year flood.
